

## P-4531 MFP/ P-4536 MFP

# Pure quality – in black and white

Fast output is important to you in the office, as is a calm and quiet atmosphere. With the P-4531 MFP or P-4536 MFP A4 black and white multifunctional systems, you have a reliable partner that prints and copies at a lightning-fast rate of 45 A4 pages per minute at up to 1,200 x 1,200 dpi; it also handles colour scanning and faxing (P-4536 MFP only) quickly and effectively. Additionally, it guarantees that your confidential data will be handled with the utmost care! But for all its power and performance, this all-rounder only requires a modest amount of space and energy – that's our guarantee, in black and white.

### What you can expect:

High performance comes as standard: The standard features of the P-4531 MFP and P-4536 MFP include an original feeder for 75 documents and a universal cassette for 500 sheets; they can be expanded to meet any need with up to four additional 500-sheet universal cassettes. Hard drives, network network or WLAN cards can also be added to ensure that the systems meet your requirements, meaning you'll be prepared for whatever tasks come your way.

Protecting the environment: The strictest environmental regulations were taken into account during the earliest design stages of these two multifunctional systems and the final products live up to those standards. You reap the benefits of energy-efficient systems with long-lasting materials that go easy on your budget and also make a positive contribution to reducing waste.

Quiet worker: Despite printing and copying at an impressive rate of 45 A4 pages per minute and scanning at 60 images per minute, the P-4531 MFP and P-4536 MFP are amazingly quiet; they can be set to 'quiet mode' to ensure that they work at a whisper-quiet volume whenever necessary. This can be a real relief for your ears and your nerves when things get hectic in the office!

Play it safe: The new systems effectively protect your documents from access by third parties. You can password-protect your print job by using the 'private printing' function, or you can use an optional card reader in connection with the Card Authentication Kit for individual users to automatically authenticate themselves. And if an optional hard drive is installed, you can use the Data Security Kit\* to effectively protect the data on it.
